Upper Central Incisors

Roth 12° torque 5° tip

Prevent over-proclination

- Non-extraction crowding
- Molar protraction to close spaces
- Class III elastics
- Reverse headgear
- Intrusion

Upper Central Incisors

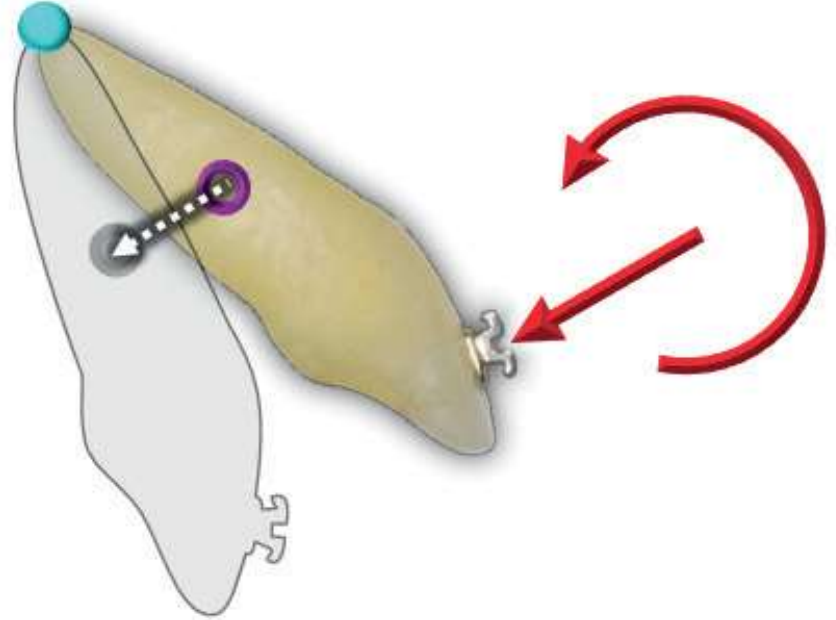

MBT 17° torque 4° tip

Prevent over-retroclination

- Extraction and retraction
- Space closure by retraction
- Total arch retraction
- Class II elastics
- Extrusion
- Bite turbos

Controlled proclination (no crowding)

- Crossbite
- Upright incisors

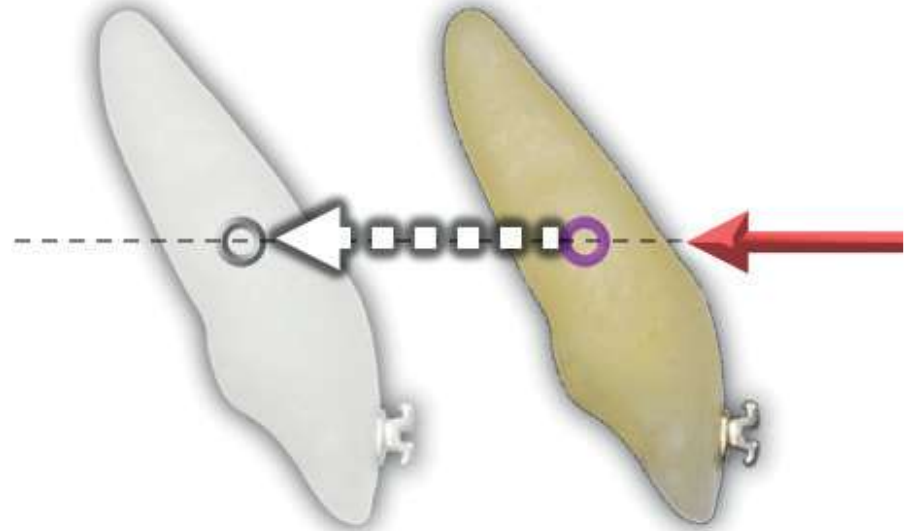

Upper Central Incisors

Super-torque 22° or 0.018 slot
Proclination of upright incisors

- Extraction and retraction
- Space closure by retraction
- Total arch retraction
- Class II elastics
- Extrusion
