

This workshop aimed to equip participants with a deeper understanding of digital learning tools and how to effectively integrate them into modern educational environments. The session began with an introduction to **Google Classroom** and its role in organizing and enhancing the teaching process. Participants learned how to create virtual classrooms, manage assignments, track student progress, and use instant feedback tools to strengthen communication between teachers and learners.

The workshop also covered strategies for improving instructional planning using various Classroom features, such as integrating the platform with Google Drive, Google Docs, and Google Forms. These tools help streamline collaboration among students and teachers and ensure that all learning materials are stored and organized in one accessible location.

The second part of the session focused on the role of **Artificial Intelligence in education**, highlighting several practical applications of AI that can enhance both teaching and learning, including:
